

I was attacked with my 12 year old son when a chemical/biological gas was remotely activated, and a failed explosion attempt using Google Auto, T-Mobil, federated computing, google.gms.chimera, giant mirror, gms.dck service, gms.gear head, gms.warm welcome, gms.thunder bird, gms.gas service, gms.cronet\_dynamite, Sarangal and other highly customized applications in my car after it was tampered with by several agencies under a bogus child rescue operation or an emergency

response in association with the department of health and human Services and possibly EPA in Raleigh, North Carolina, at 6:00 pm on August 17, 2023, on the road shortly after leaving the triangle town center mall on capital Blvd.

My child was approached by someone, an

adult who posed as a peer online, manipulated and blackmailed him into participating, not knowing he was about to get killed too in order to wash any evidence of the orchestration. A couple of weeks before August 17 2023, my son started behaving strange, even left his iPhone for someone to pick up and gain access to my icloud and connected devices, I traced the phone to a textile lab at NC state university on Hillsborough street in Raleigh where it stayed for a few days before it disappeared.

The car reduced power, locked doors, windows controls, then white mist started to come out the AC vent and moved downwards towards the floor. my first thought was a freon leak, but my son started panicking and screaming. I don't want to die! We both got severely dehydrated immediately. It was difficult to blink from eyelids being

so dry, I had never seen anything like this before or since. The attack was also live streamed to some local churches and east wake TV station.

About an hour after we made it home, 5 wake county sheriff vehicles full of officers came to the house, sarcastically asked what happened and if I believed in the paranormal!. They left and before I got a chance to ask my kid what he knows, they came back and asked if he could spend the night at his estranged mother who

walked away and wanted nothing to do with him. They took him, and I hadn't seen him or talked to him since, not until 4 months ago, once, and he was very uneasy and scared. then only a few texts, and I'm not sure it's him. They won't give me a welfare check on him, either.

Cameras were set up, the house was searched, and certain events were orchestrated before, after, and during the gassing.

I need help forwarding this to the FBI in Washington D.C. because I'm blocked from reaching any help, the geo blocking uses cloud services like Acamai, Amazon, stack overflow, Google cloud, Google API, google double click, Google Tag Manager, Container service, AWS cloud, Apple quick look extension UI, airurbanship, amazon C3 cloud, gerrit code

review and othes. They  
bypass VPN and get  
authentication through FIDO  
Alliance, temporarily  
changing privacy policy to  
china as well as the device  
ownership during the attack.

After many threats, break-ins  
into home and place of work,  
the destruction of my

vehicle and shattering windows of my car and store front, I left the country to Jordan, thinking I'll be able to send or receive emails or be visible on social media but still restricted.

I contacted every related and unrelated agency, in person, by phone, emails, and portals, and still nothing. A domestic terror attack by individuals in uniform, followed by the academic illegal blocking, misuse of AI, abusive online content, and interactions.

Before all this started my son

showed me an AI or spirit hunting app that turned out to be another surveillance and a way for the law enforcement for surveillance and abusive communication where they can manipulate, communicate threats and racial slurs in addition to syncing with every other application on your device all of them including dating and financial, I

also have the proper logs and manifests.

15 months, several networks, countless devices, accounts, and locations, i have yet to hear back from anybody. I'm also unable to log into banking services or stock trading account.
